(一) L'élection de François Hollande à la présidence de la République avec 51,62 % des suffrages comporte au moins deux avantages.

Elle sanctionne l'échec de Nicolas Sarkozy et de son projet de transformation du pays. Le président sortant avait prétendu réconcilier les Français et l'argent. Dans son esprit, cela imposait simultanément de glorifier les riches et de les exonérer de toute responsabilité sociale dès lors qu'au combat contre les inégalités il préférait les diatribes contre l'« assistanat » ou l'immigration.

Le deuxième avantage de l'élection de François Hollande est qu'elle sonne le glas d'un antisarkozysme qui, miroir inversé du narcissisme du chef de l'exécutif, a personnalisé à l'excès la question des orientations politiques.

(二) Le « sursaut » démographique se manifeste au tout début du XIXe siècle. Il accompagne l'industrialisation de l'Europe et du nouveau monde. L'accélération se poursuit tout au long du XXe siècle, avec l'intensification de l'urbanisation et les progrès de la médecine. Mais l'essentiel de cette croissance pèse sur les pays les moins développés : au début du XIXe siècle, la population des pays riches équivalait à celle des pays pauvres. D'un pour cinq dans les années 2000, le rapport sera d'environ un pour huit vers 2050. Le sociologue Jack A. Goldstone qualifie cette dissymétrie de « bombe démographique » : ce n'est pas la surpopulation que l'humanité doit craindre, mais plutôt les risques liés à l'accroissement des déséquilibres dans les niveaux de développement, avec le gonflement spectaculaire de la population des pays pauvres et le vieillissement de celle des pays industrialisés.

### 臺灣將推出「國內幸福指數」

臺灣將於 2013 年推出其「國內幸福毛額指數」。行政院主計總處表示，臺灣將參照經濟發展暨合作組織所推動的模式，設計一套工具來呈現臺灣人的幸福感。經濟發展暨合作組織於 2011 年 5 月 24 日推出「你更好的生活」(Your Better Life) 方案，其任務就是要「在全球各地推動能改善經濟及社會福祉的政策」。這項方案刻在 34 個國家進行，依據 11 項標準，以選定的標準進行相互影響的測試。這些標準包括生活條件(居住、收入、保健)及生活品質(社區、教育、環境、施政、衛生、個人滿意度、安全、工作/休閒的均衡度)。臺灣並非經濟發展暨合作組織的會員國，但已決定自 2013 年起將依相同的標準公布臺灣的幸福指數。

The danger of delaying childbearing, of course, is that a woman who eventually wants a baby may be unable to have one because her eggs are no longer viable. But researchers have developed a procedure that, 14 not stopping a woman's biological clock, can in effect act as a snooze button. Egg freezing, or "oocyte cryopreservation," uses hormones to boost a woman's production of eggs, which are then extracted and frozen, 15 them to be thawed, fertilized, and implanted in her womb at a later date. Freezing puts the eggs in a state of 16 animation, meaning that in theory, a woman can keep a viable store of eggs on ice long after her body's natural supply is depleted.

While egg freezing is available primarily to cancer patients facing infertility from chemotherapy and radiation, a growing number of clinics are offering the procedure to 17 healthy women who simply want to postpone childbearing for personal reasons.

Scandinavian countries have been the pacesetters in the development of many of the nontraditional forms of family living, especially births outside of wedlock and cohabitation outside of legal marriage. Women in these societies also have the highest rates of labor force participation. However, in at least two aspects, the United States is setting the pace: Americans have, by far, the highest divorce rate of any industrial nation, as well as a higher incidence of single-parent households, one of the most economically vulnerable segments of the population. Japan is the most traditional society of those studied, with very low rates of divorce and births out of wedlock and the highest proportion of married-couple households. In fact, Japan is the only country studied in which the share of such households has increased since 1960. But even in Japan, family patterns are changing: sharp drops in fertility have led to much smaller families, and the three-generation household, once the mainstay of Japanese family life, is in decline.

- 18 According to the passage, which of the following distinguishes Scandinavian countries from other countries studied?  
(A) Children born outside of marriage. (B) Sharp drops in fertility.  
(C) The highest divorce rate. (D) The fast economic development.
- 19 According to the passage, which country has the highest rate of single-parent households?  
(A) Norway. (B) Denmark. (C) The USA. (D) Japan.
- 20 According to the passage, which of the following is NOT found in Japan?  
(A) A decrease of three-generation households. (B) A high birth rate.  
(C) An increase of smaller families. (D) A high proportion of married-couple households.
