bigger threat at so-called mass gatherings.

According to Professor Steffen, children and older people have the highest risk of injury or other health problems at mass gathering events. Children are at more risk of getting crushed in stampedes, while older people are at higher risk of best streke and dwing from extreme heat.

mass gathering events. Children are at more risk of getting crushed in stampedes, while older people are at higher risk of heat stroke and dying from extreme heat.

Stampedes at mass gatherings have caused an estimated seven thousand deaths over the past thirty years. The design of process gathering can play a part. There may be parrow passages or other shelps points that too many people try.

an area for mass gathering can play a part. There may be narrow passages or other choke points that too many people try to use at once. The mood of a crowd can also play a part. Organizers of large gatherings need to avoid creating conditions that might lead to stampedes and heat stroke.

So what advise does Professor Stoffen have for people attending a large gathering? First, get needed vessinations

So what advice does Professor Steffen have for people attending a large gathering? First, get needed vaccinations before traveling. Then, stay away from any large mass of people as much as possible. Also, be careful with alcohol and drugs, which can increase the risk of injuries.
