- (—) The Customs value of imported goods is determined mainly for the purposes of applying ad valorem rates of Customs duties. It constitutes the taxable basis for Customs duties. It is also an essential element for compiling trade statistics and collecting internal taxes applicable to imported goods.
- (=) Through use of a risk management system, Customs can determine which traders are generally in compliance with Customs legislation and thus pose a low risk for control purposes. These traders can then be approved for "fast track" procedures that require little intervention by Customs for the release of their goods.
