第一題：

公文（函）

臺灣金融控股股份有限公司於民國 106 年 0 月 00 日召開第○次○○會議，會中回顧歷年來旗下各子公司（臺灣銀行、臺銀人壽、臺銀證券、臺銀保經），秉持「取之於社會、用之於社會」之理念，分別辦理各項公益活動，深獲社會各界好評，但因各子公司所能運用之資源不一，難以同時、完整呈現該金控集團在金融界橫跨銀行、證券及壽險三大範疇業務之優勢。因而決議明(107)年臺灣金控公司成立 10 週年慶，擬統籌集團資源，強化集團三大範疇業務與社會公益之連結，精心設計多元活動，諸如藝術(含繪畫、書法、攝影、音樂、……)創作、評選、展覽、演奏，使金融業融入更多文化涵養，並加深國人對臺灣金控業務之認知。另或如攜手社服機構關懷銀髮安養及弱勢族群，樹立國營企業支持國家政策與善盡社會責任之典範。

請參考以上資料，試代業務承辦人高仁和撰擬臺灣金融控股股份有限公司致旗下各子公司函：為明(107)年本公司成立 10 週年慶，擬統籌集團資源，強化集團三大範疇業務與社會公益之連結，精心設計多元活動，請指派貴公司相關單位主管參加籌備會議。

### 三、克漏字測驗【請依照段落上下文意，選出最適當的答案】

The design of many engineering systems can be a fairly complex process. Many assumptions must be made to develop models that can be subject to analysis by the available methods and the models must be 16 by experiments. Many possibilities and factors must be considered during the problem formulation 17. Economic considerations play an important role in designing cost-effective systems. To complete the design of an engineering system, designers from different fields of engineering must find ways to 18. For example, the design of a passenger car requires cooperation among structural, mechanical, automotive, electrical, human factors, chemical, and hydraulics design engineers. Thus, in a(n) 19 environment considerable interaction is needed among various design teams to complete the project. In addition to the design of a system, developing procedures to measure the performance of a system is essential. A measure of performance is to be optimized while satisfying all constraints as well as ensuring quality. 20, the revolution in computer technology allows today's computers to perform complex calculations and process large amounts of data rapidly both for initial design and later performance measure.

### 四、閱讀測驗【請在下列各題中選出最適當的答案】

Regular exercise is beneficial to cardiovascular health and longevity. The Centers for Disease Control and Prevention and the American College of Sports Medicine recommend a minimum of 30 minutes of moderate-intensity physical activity on most days of the week. According to the National Institutes of Health-American Association of Retired Persons Diet and Health Study, achievement of activity levels approximate the recommendations for moderate activity (at least 30 minutes on most days of the week) may decrease 27% of mortality in men and women. In developing countries, the fast increase of cardiovascular disease mortality may partly be attributed to the decrease of physical activity. The death rate of cardiovascular disease in China, for example, nearly increased 50% from 1990 to 2009, and the decrease of exercise participation played an important role in the increase of mortality. A recent investigation in 9 provinces and cities of China showed that the physical activity in 2006 declined by 27.8% in men and by 36.9% in women in comparison with those in 1997.

Non-vigorous exercise training is a central focus of health promotion and is the core component of rehabilitation for patients with cardiovascular disease. According to a recent meta-analysis evaluating the effect of light-to-moderate physical activity, 2.5 hour/week moderate-intensity activity, that is, 30 min exercise 5 days a week, compared with no physical activity was associated with a reduction in mortality risk of 19%, while 7 hour/week of moderate activity compared with no activity reduced the mortality risk by 24%.

Tai Chi is a Chinese traditional mind-body exercise. Although the exercise intensity of Tai Chi is low to moderate, previous studies have shown that it offers benefits for aerobic capacity, muscular strength, balance, and cardiovascular risk factors. Further, Tai Chi appears to be safe and effective for patients with acute myocardial infarction, coronary artery bypass grafting surgery, congestive heart failure, and stroke. From the standpoint of exercise prescription, Tai Chi is a suitable exercise for patients with cardiovascular disease because it is easily accessible and of low cost and can be easily implemented in the community setting. The aim of this literature review is to provide an overview of Tai Chi benefits on cardiovascular health and to introduce the potential application of Tai Chi for patients with cardiovascular disease.
