Internet cookies are small information files that websites put onto personal computers. The main function of cookies is to give Internet users quick <u>42</u> to webpages. For example, because of cookies, customers on e-commerce sites can keep items in their shopping carts while they look at <u>43</u> products and then check out with ease whenever they are ready. Cookies also allow a website to remember personal information such as a <u>44</u> name, home address, email address, and phone number, so that these items do not have to be <u>45</u>. For online sellers, cookies provide an important advantage. They allow the sellers to collect information about visitors to a website. <u>46</u> can then use the customer data for advertising and other marketing purposes. Although there are concerns about what sellers might do with private information, it is clear that cookies have their benefits.

## 請依下文回答第 47 題至第 50 題:

The *Warcraft* video game franchise from Blizzard Entertainment is now 22 years old. The most successful game in this series has been *World of Warcraft* (*WOW*), a massively multiplayer online role-playing game. According to Blizzard, over 100 million subscribers have played *WOW*. The extremely popular spinoff game *DOTA* (*Defense of the Ancients*) is also played at some of the biggest gaming competitions in the world.

Over the years, WOW has been considered by many people to be more than just a game. It has also been seen as a training ground for real-life business leaders. Players in WOW join together in large teams, called guilds. A player who wishes to be a successful leader, or "master," of a team must learn how to attract new players to the group, evaluate each player, and arrange for him or her to be taught by experienced players. In addition, the leader must settle any quarrels that develop between team members and oversee development of strategies that the team will use to defeat its opponents. The lessons the leader learns through the game can be applied in real life.

A *Warcraft* film, in development since 2006, hits theaters this month. Its plot focuses on the arrival of Orcs looking to build a colony in the realm of humans and the conflict that arises between the two groups. Video-game fans will be pleased to know that the film's director, Duncan Jones, is a player of the game, as are some of the actors. Anticipated by both gamers and movie fans, *Warcraft* may be the next big film franchise.

- 47 What is this passage mainly about?
  - (A) Making big money through games.
  - (C) WOW's success story.

48

- Which of the following statements is true about *WOW*?
- (A) It offers useful training for leadership.
- (C) It leads to quarrels among its players.
- 49 What will the guilds of *WOW* NOT do?
  - (A) To attract new players.
  - (C) To hold a contest.
- Which of the following do the gamers look forward to?
  - (A) A new series of Warcraft online magazine.
  - (C) A workshop that extends the Warcraft game.

- (B) Beating opponents in video games.
- (D) WOW's excellent reviews.
- (B) It is not practical for real-life business.
- (D) Its teams are quite localized.
- (B) To settle any quarrels.
- (D) To evaluate each player.
- (B) A motion picture based on Warcraft.
