依下文回答第16題至第20題

Plastiki is a given name for a catamaran made-up of 12,000 consumer-used plastic bottles. It has undertaken a 8,000 nautical mile journey from San Francisco to Sydney to draw public attention to the problem of eco-contamination. It is the innovation of British adventurer David de Rothschild, who along with two skippers Jo Royle and Olav Heyerdahl led the 100-days expedition to explore the pollution of the oceans due to plastic littering. David came up with the idea of using plastic bottles to build the Plastiki to show how we can beat waste by reusing it. The route taken by Plastiki includes travelling through the Pacific Ocean Garbage Patch, a highly concentrated area of plastic in the deep North Pacific Ocean. Plastiki not only managed to display the ill-effects of plastic non-decomposition but also conveyed its intents to the public to actively stop using plastic and switch over to other bio-degradable items.

When we throw things away, there is no "away."All the waste goes somewhere and in the not too distant future "away" will be full. Then what? Plastiki's mission is to educate as many people as possible on how to beat waste and re-think waste as a resource. It was made from reclaimed plastic bottles and recycled waste products. This is the main reason why the catamaran and its journey are getting accolades.

16 What is a catamaran?

	(A) submarine	(B) yacht	(C) lorry	(D) freighter
17	David ventured on the	voyage with two skipper	s, who were	
	(A) captains	(B) pilots	(C) miners	(D) entrepreneurs

High-speed rail (HSR) is a form of railway transportation which runs at a high speed. It uses an integrated system of dedicated tracks and rolling stock to attain the high speed. While there is no single standard that applies worldwide, new lines in excess of 250 kilometers per hour (160 miles per hour) and existing lines in excess of 200 kilometers per hour (120 miles per hour) are widely considered to be high 21. The first high-speed train began its 22 in 1964 in Japan, and they were called bullet trains. They run on standard gauge rail with continuously welded rails.

China's HSR (High-speed rail) is the longest HSR network in the world; it is China's network of passenger-dedicated railway. It was extended to 29 more provincial-level administrative divisions in 2017 which gives it a total length of 25,000 km. This <u>23</u> approximately two-thirds of the global high-speed railway for commercial services. In 2017 it completed nearly 2 billion trips.

<u>24</u> China has over two-thirds of the World's High-speed rail, its network does not cross into the neighboring nations. The HSR crosses <u>25</u> boundaries only in Europe. Belgium is served by four operators TGV, ICE, Eurostar and Thalys trains all from neighboring countries. ICE trains reach Switzerland and Belgium while TGV rail has extended to Italy, Luxembourg, Germany, and Switzerland. Eurostar connects London to Brussels.
